9-1-1 Emergency Response Rural Address Markers

Decrease emergency response time by eliminating rural addressing confusion. The Quantum Rural ID Marker quickly & economically identifies rural address locations. Knocked down or rusted markers are difficult, if not impossible to locate. Quantum markers are designed to stay on the job. The unique reinforced composite construction withstands substantial field abuse. These highly visible, lightweight markers are designed to withstand repeated vehicle impacts, flexing out of the way and returning to the original upright position.

Response time is a critical factor in determining the outcome of an emergency situation. Quantum markers can play an important role in quickly locating the correct address in an emergency and thereby save lives!

Features

Weather Resistant

Constructed from a fiberglass reinforced composite which is UV resistant and temperature stable. They will not become brittle when cold or soften under heat, thereby remaining flexible in virtually all weather conditions.

Lower Maintenance

Solid color impregnated throughout the marker. Never needs painting! Will not fade & crack like thermoplastic or rust & rot like metal or wood.

Flexible

Capable of withstanding repeated vehicle & livestock impacts, thus greatly reducing the added cost of maintenance associated with marker repair or replacement.

Easy Installation

Installs fast and easy using industry standard tools. A typical installation takes less than one minute.

Versatile

Available with or without identification decals, reflective sheeting or letters & numbers. Choose from a variety of colors and sizes to match your application. Small signs can also easily be attached to the marker.

Lightweight

Strong composite material is 75% lighter than steel & 10 times stronger than typical thermoplastic. Easily stores and transports to the job site.

Fire Resistant

Capable of withstanding small grass fires and controlled ditch burns. Will not soften and melt like common plastic.

Cost Effective

Longer life, lower maintenance and reduced transportation cost. Quantum Flexible Composite Markers stay on the job longer with lower overall cost.

Quantum Flex™ Emergency Response Marker QM-375 Specifications

Material: Glass Reinforced Polyester Composite
Weight: 0.62 lbs per foot
*Standard Lengths: 62, 66, & 72 inch
Width: 3 15/16 inch
*Standard Colors: White, Orange, Yellow, Blue, Brown,
Green, & Red

* Custom colors or lengths available upon request

ADDITIONAL APPLICATIONS:

- Gas & Water Pipeline Markers • Roadside Delineation
- Valve Box Markers • Manhole Identification
- Fiber Optic Cable & Pedestal Identification
- Right of Way Easements • Fire Hydrant Markers
- Park & Recreation Trail Markers • Golf Course Markers

EASY INSTALLATION

Installation is easy as 1, 2, 3!

1. Insert marker into driver
2. Rotate driver with marker into position
3. Drive marker with a series of light taps
(Brace your foot against marker to stabilize during installation)

The unique symmetrical three rib profile optimizes rigidity, stability and flexibility & provides an unobstructed recessed (protected) message area on both sides of the marker from impact
