## QM-250

### Fiberglass Composite Boundary Marker ID Post

An economical marker designed for applications where lower profile identification and less flexibility is preferred. The QM-250 incorporates a greater degree of rigidity while still providing some flexible characteristics. The unique dual ribbed design improves installation, even in the toughest soil conditions, as well as providing a space between the ribs, allowing for easy center attachment of supplemental signs. A versatile marker, the QM-250 can maintain a lower profile by using optional factory applied decals, or can support higher profile signs with relatively low wind displacement. Lower flexibility does not mean sacrificing the benefits of a flexible marker. This marker can still survive vehicle impacts, livestock contact and most vandalism without severely affecting its performance. For high impact, high vandalism areas, we recommend the more flexible QM-375 marker.

## Features

- |                          |  |
|--------------------------|--|
| <b>Weather Resistant</b> | Quantum Markers are constructed from a fiberglass reinforced composite which is ultraviolet resistant and temperature stable. They will not become brittle when cold or soften under heat, thereby remaining flexible in virtually all weather conditions. |
| <b>Lower Maintenance</b> | Solid color impregnated throughout the marker. Never needs painting! Will not fade & crack like thermoplastic or rust & rot like metal or wood.  |
| <b>Flexible</b>          | Capable of withstanding moderate field abuse. Returns upright after vehicle & livestock impacts, thus greatly reducing the added cost of maintenance associated with marker repair or replacement.   |
| <b>Easy Installation</b> | Installs fast and easy using industry standard tools. A typical installation takes less than one minute.   |
| <b>Versatile</b>         | Available with or without identification decals, reflective sheeting or letters and numbers. Choose from a variety of colors and sizes to match your application. Small signs can also be easily attached to the marker.                                   |
| <b>Lightweight</b>       | Strong composite material is 75% lighter than steel & 10 times stronger than typical thermoplastic. Easily stores and transports to the job site.  |
| <b>Fire Resistant</b>    | Capable of withstanding small grass fires and controlled ditch burns. Will not soften and melt like common plastic.  |
| <b>Cost Effective</b>    | Longer life, lower maintenance and reduced transportation cost. Quantum Flexible Markers stay on the job longer with lower overall cost.   |

# QM-250 Specifications

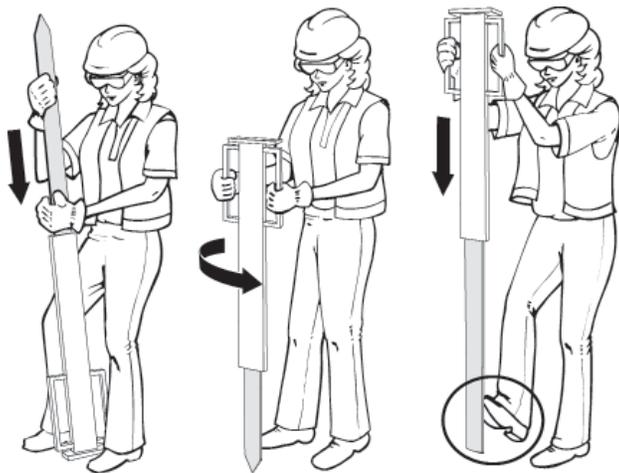

Material: Glass Reinforced Polyester Composite  
Weight: 0.31 lbs per foot  
\*Standard Length: 66 & 72 inch  
Width: 2.5 in.  
\*Standard Color: Orange, White, Blue & Yellow

\* Custom colors or lengths available upon request

## ADDITIONAL APPLICATIONS:

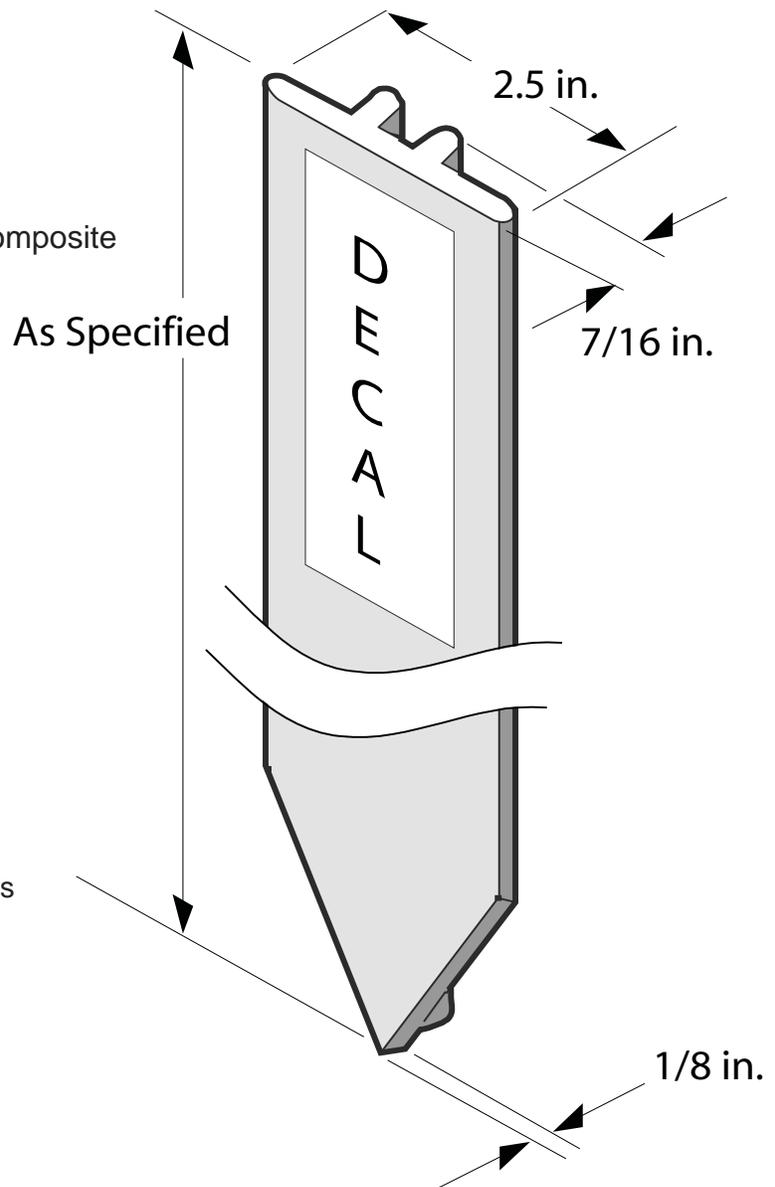

- Property Boundary Markers • Survey Monument Post
- Valve Box Markers • Manhole Identification
- Fiber Optic Cable & Pedestal Identification
- Right of Way Easement ID • Fire Hydrant Markers
- Park & Recreation Trail Markers • Golf Course Markers

## EASY INSTALLATION

Installation is easy as 1, 2, 3!

1. Insert marker into driver.
2. Rotate driver with marker into position.
3. Drive marker with a series of light taps.  
(Brace your foot against marker to stabilize during installation)

The unique dual rib profile optimizes rigidity & stability while still maintaining a degree of flexibility. This design, unique to Quantum provides for easy center drilling & attachment of optional signs and hardware.
