## Quantum 3.5" Dome Marker QM-350D

Quantum Dome Markers are engineered to provide 360 degree visible identification of your underground pipelines, cables, valves and other valuable utilities. You have a substantial investment in your underground infrastructure. Reducing exposure to expensive accidental dig-ins and service interruptions is critical. Quantum Dome Markers provide an economical, highly effective way to alert those who are working or digging in the vicinity as to the location and identity of underground utilities. The dome marker post has a 3.5" outside diameter and is available in all standard lengths and colors and comes complete with graphics and soil anchor bar. Cathodic Protection test terminal options are also available.

## FEATURES

QM-350D

QM-350TS

QM-TS5

- Highly Visible** The 360° cylindrical shape insures that the Quantum Dome Marker can be seen from all angles on the ground and by air patrols. Post and dome colors can be mixed to achieve specific color coding options.
- Weather Resistant** Constructed from a special thermoplastic compound that is UV resistant and extremely durable. Will not rust or rot. Never needs painting. Each marker is available with a special graphics system that utilizes a chemical etching process that will not fade, peel or chip.
- Versatile** Choose from a variety of colors and sizes to match your application. Custom warning messages are standard on both sides of the marker. Graphics are customized to meet customer specifications and U.S. Department of Transportation regulations. No decals needed.
- Simple Installation** All markers come complete with a soil anchor bar. Easily Installs without requiring any special tools or equipment.
- CP Options** Cathodic Protection terminals can be retrofitted to the marker designed to provide trouble free monitoring of electrical currents & potentials on underground pipelines & other metallic structures.
- Eco Friendly** The marker post is an environmentally friendly way to identify your underground utilities. It is 100% recyclable.
- Cost Effective** Longer life, lower maintenance and increased viability. Quantum Dome Markers stay on the job longer with lower overall cost.

# QM-350D

## SPECIFICATIONS

Material: HDPE

Weight: 0.54 lbs per foot

Width: 3.5 inch

Wall Thickness: .135

\*Standard Lengths: 72 & 96 inch

\*Standard Dome Colors: White, Orange, Yellow, Blue, Green, Red, Purple, Black

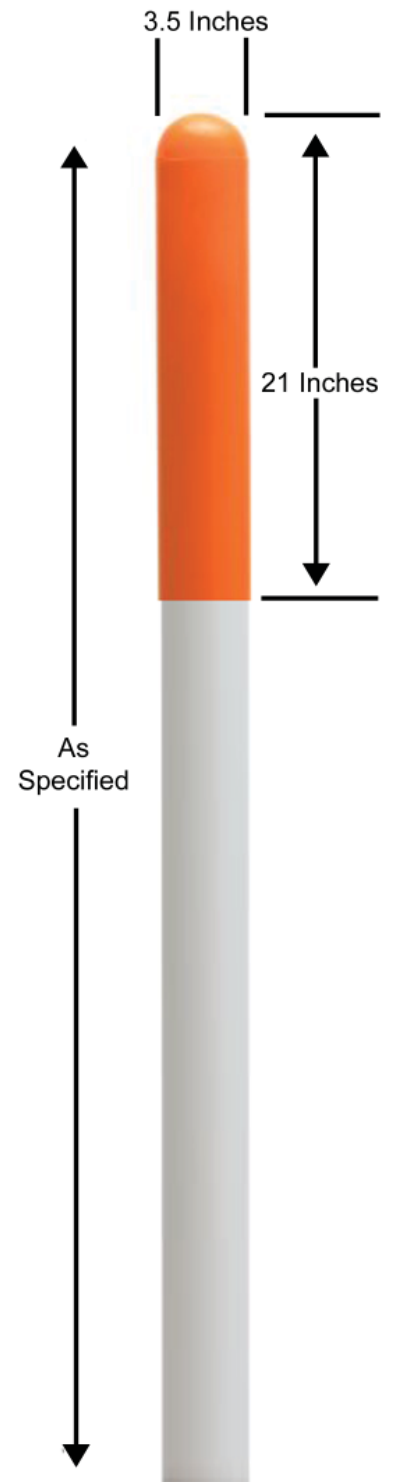

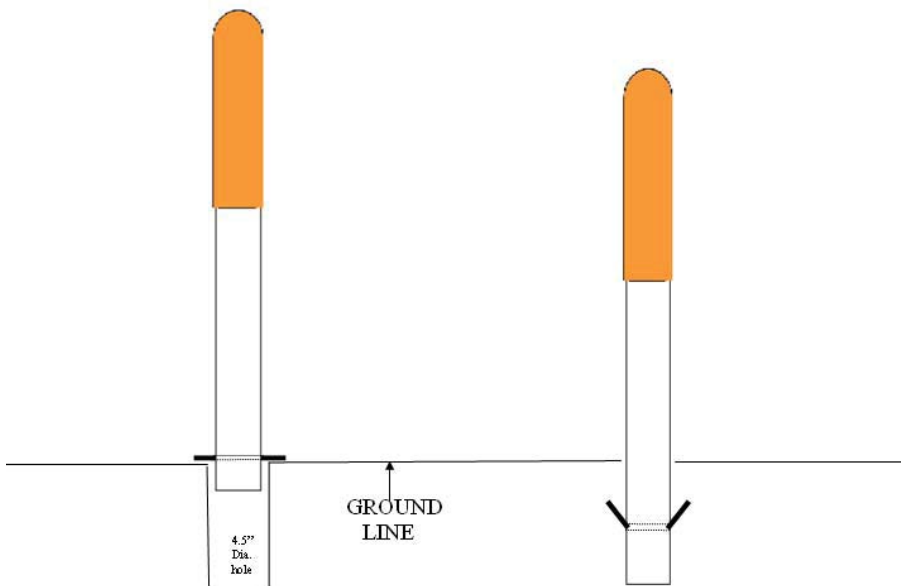

\*Standard Post Colors: White, Orange, Yellow, Blue, Green, Red, Purple, Black

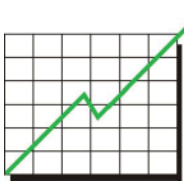

\* Custom colors or lengths available upon request

## INSTALLATION INSTRUCTIONS FOR DOME MARKER WITH ANCHOR BAR

1. Dig hole. ( small auger or post hole digger)
2. Line the marker on top of the hole with plastic anchor in place as shown on first drawing.
3. Push the marker down to the bottom of the hole. Flexible anchor will create a fish-hook effect and prevent the post from withdrawing
4. Align marker straight in the hole then backfill and tamp earth as shown in the second drawing.

Post Diameter	Minimum Hole Diameter	Suggested Hole Depth
3.5"	4.5"	18" - 24"

## Cathodic Protection Terminal Board Test Station QM-TS5 & QM-350TS

The QM-TS5 Test Station is a 3.5" diameter screw cap enclosure that protects circuits and terminals designed to provide trouble free monitoring of electrical currents & potentials on underground pipelines & other metallic structures. Other applications include tracer wire terminal points and telecommunications bonding and grounding terminals. TS5 Test Stations are manufactured in the USA from high impact UV stabilized polycarbonate. TS5 Test Stations come standard with five stainless steel terminals and can be ordered with a High-Density Polyethylene conduit/support post. The TS5 is also available with an optional custom graphic sleeve (QM-350TS) that turns the test station into a highly visible pipeline marker.

**QM-TS5**

**QM-350TS**

**Markers are available in the following standard colors:**

**ORANGE · GREEN · RED · BLUE · YELLOW · WHITE · BLACK**

**Standard lengths are 6 foot & 8 foot - Custom lengths are available.**

**Custom colors, logos and other special requirements are available by request.**

**All markers come complete with anchor bar.**
